

[Work](#)[Fun](#)[About](#)[Resume](#)

Hello, I'm Tammy

I've climbed an active volcano

Currently

Gen AI @ Figma

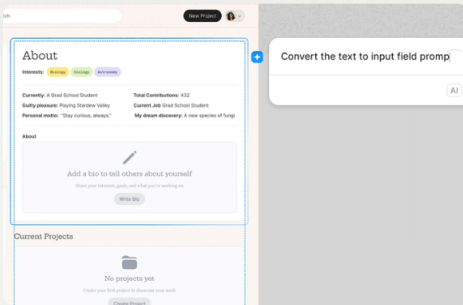

Previously at

Meta, Xbox & Instok

Nice to meet cha'

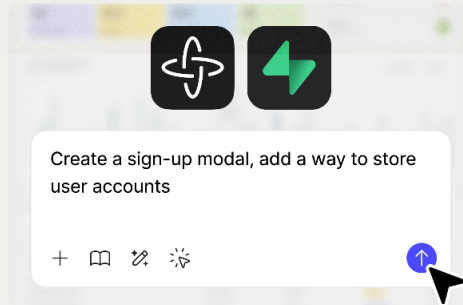

I am your resident jack-of-all-trades: product designer, front-end engineer, illustrator and design systems fanatic. I like building cool things and solving hard problems.

Figma prompt to edit

Founding member of the AI powered prompt to edit tool. Defined and designed product vision, prompt engineered and collaborated with researchers to improve model quality, jammed on road maps and shipped code.

Figma · 2025

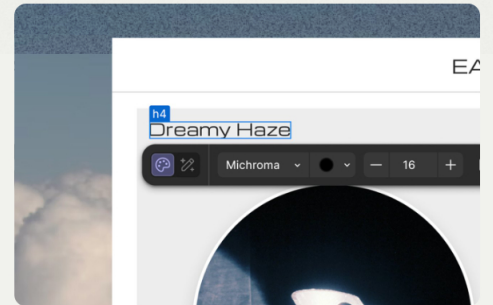

Figma Make Supabase

SHIPPED 71

Designed the Figma Make x Supabase integration, shaping end-to-end UX and partnering with UX writing for technical copy and engineers to sort out edge cases, error states and bugs.

Figma · 2025

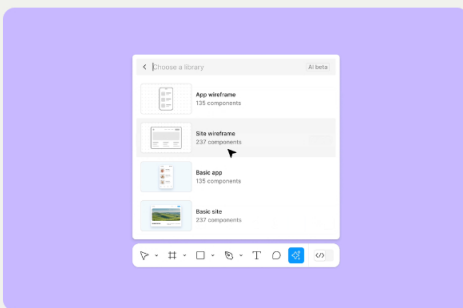

Figma Make edit tool

SHIPPED 71

Designed and shipped V1 of the editing tool in Figma Make for one off style edits. Shipped visual polish code fixes to support engineers.

Figma · 2025

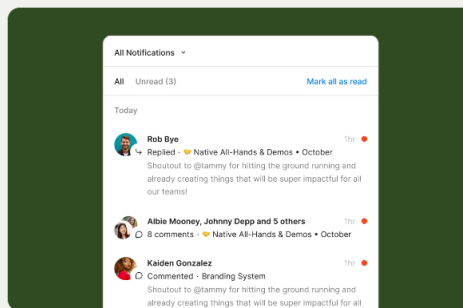

First Draft relaunch

SHIPPED 71

Redesigning the underlying design system, creating web and mobile wireframing kits and supporting redesigning the UI as part of Figma's post-config relaunch of First Draft.

Figma · 2024

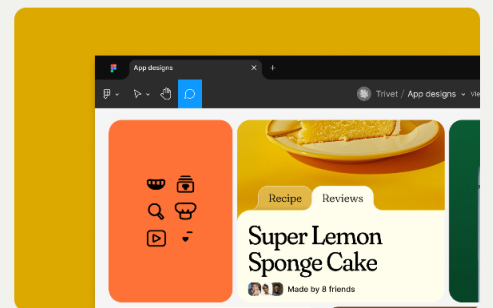

Notifications

SHIPPED 71

Improving the information architecture and parseability of Figma's notification feed with a visual redesign. This includes a scalable and robust system to support future notifications.

Figma · 2024

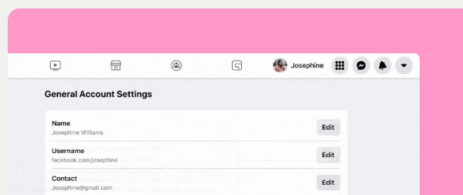

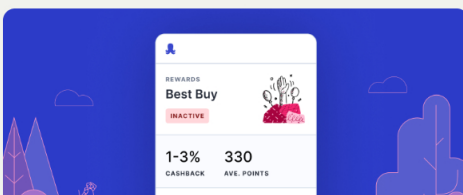

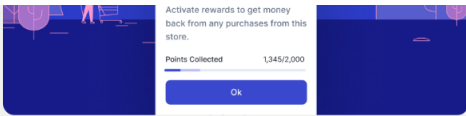

ChromeOS PWA

SHIPPED 71

Adding progressive web app (PWA) support for downloading Figma on Chromebooks and ChromeOS. Announced and presented during the Google I/O 2024 Chrome keynote.

Figma · 2024

Octoshop

ACQUIRED ↗

Co-founded a startup for online shopping with price comparison and cashback. I designed and developed the design system and core flows. 130k users and 300k ARR in 18 months. Acquired by Ibotta.

Instok · 2022

Account settings

SHIPPED ↗

Redesigning Facebook's account settings to match the new, modernized interface and building a framework for future account setting additions. This change impacts 9 million+ users daily.

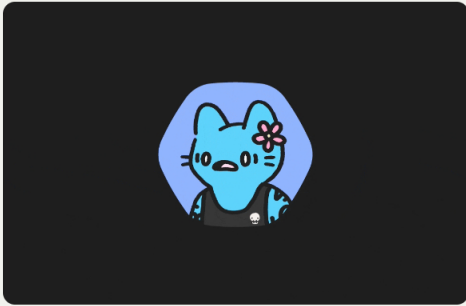

Meta · 2022

Museum AR/VR

A side project exploring AR/VR technology to make museums more engaging. This case study includes a design system, brand identity kit, web and mobile app and mobile AR add headset VR experiences.

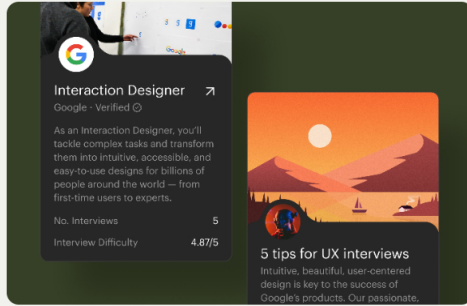

Side project · Case study · 2022

NFT gallery

Finary (YC21) is a fin-tech investment platform and chat forum. This project focused on allowing users to select NFT profile pictures and feature their collection in an NFT gallery on their profile.

Finary · Case study · 2022

Menti

Side project and coded prototype show casing a platform for designers to find mentorship, get company insider tips and tricks and practice for design interviews

Side project · Case study

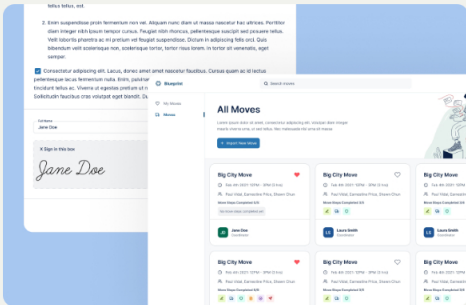

Design system

SHIPPED

Revamping and unifying Boston Scientific's design system for their suite of products. This case study focuses on my work on redesigning pictograms for clarity.

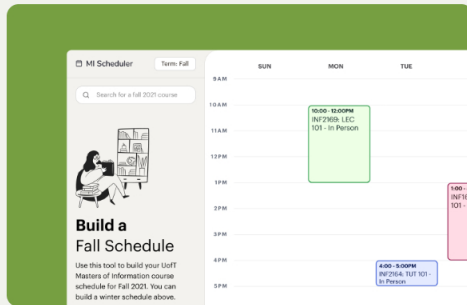

Boston Scientific · Case study · 2020

Move management

A 0-1 web application for a non-profit that supports move coordination. We automated a waiver signing process and built templates for more streamlined and consistent planning

Blueprint · Case study · 2020

MI scheduler

Improving the class schedule planning process for Master of Information students that visualizes potential schedules. This tool sees 500 new users every calendar year.

Side project
